

British Infection Association

20th Annual Meeting

Thursday 25th May 2017

Brunei Gallery Lecture Theatre, School of Oriental & African Studies,
Thornhaugh Street, Russell Square, London WC1H 0XG

CALL FOR ABSTRACTS

Dear Colleagues

The 20th Annual Spring Scientific Meeting represents a superb opportunity to communicate with and to learn from colleagues working in the full range of infection-related disciplines. The Trainees' day is on the Wednesday 24th May 2017, and the main meeting is on the Thursday 25th May 2017.

But there is no show without punch, and we need you, the members, to be prepared to contribute through presenting your research, laboratory or clinical, and your clinical lessons.

The ideal presentations are those given by colleagues who are currently in post-graduate training, as they (you!) represent the future of infection research and practice in the UK.

That said, we are always happy to receive abstracts from anyone who would like to present, including principal researchers, consultants and non-clinical scientists. Where possible we would encourage consultants and lead researchers to consider asking more the junior members of their teams to deliver the presentation.

This year, the venue is the excellent SOAS at the University of London, and we are very fortunate to have three distinguished invited speakers joining us, Professor James McCarthy of Australia, Dr Bridget Atkins of Oxford and Professor Jon Sayers of Sheffield.

So please submit the best and most thought-provoking abstracts you can muster - the team at BIA will be very pleased to receive them. We will be awarding prizes (actual money) to support attendance at overseas meetings or other educational activity for the best scientific (£1000, £500 second prize) and clinical case (£250) presentations.

Happy writing!

Regards to all
Steve Green

20th Annual Meeting

Thursday 25th May 2017

You are invited to submit abstracts for the 20th Annual BIA Spring Meeting. Abstracts should be submitted as free papers or clinical lessons.

INSTRUCTIONS FOR SUBMISSION OF ABSTRACTS

- Abstract submission is via the BIA website <http://www.britishinfection.org>
- Click on the link for BIA Spring Meeting
- Click on the link for abstract submission and follow instructions
- After registration with the abstract administration system, the abstract instructions for abstract submission will be e-mailed to you

Free papers (*maximum 250 words*) - Abstracts should state briefly and clearly the purpose, methods, results and conclusions of the work.

Introduction: Clearly state the purpose of the abstract

Methods: Describe your selection of observations or experimental subjects clearly

Results: Present your results in a logical sequence in text, tables and illustrations

Discussion: Emphasize new and important aspects of the study and conclusions that are drawn from them

Clinical lessons (*maximum 250 words*) - Abstracts for the Clinical Lessons session should be cryptic ie not give the game away! Successful submissions usually have a clear 'take-home' message.

A second abstract with same title should be prepared and submitted which gives the answer and the lessons learnt to the selection committee; this abstract should be suitable for final publication as a short case report after the meeting. Please give details in the second abstract of any images eg Radiology that are available to support the presentation. During the submissions procedure you will be given the opportunity to submit the second abstract. Please give the second abstract the same title, and also add 'Covering letter' to top of the text.

- **The deadline for submission of abstracts is 5 pm, 24th March 2017.** Please note that you will not receive any reminders before this date. Authors will be notified of acceptance by the 21st April 2017
